FOREWORD

In response to a general demand this list of accredited four year secondary schools comprising private high schools, academies and preparatory schools connected with colleges has been prepared. The list should prove useful in the evaluation of credentials of candidates for admission to higher institutions of learning.

The classification of these schools is based upon written reports and inspection of the work by representatives of the Department of Public Instruction.

The standards and requirements for accrediting secondary schools are included to assist principals and students in planning their curricula to meet preliminary requirements of the various professions.

The list includes the accredited four year private secondary schools for the years 1928-1929 and 1929-1930.

This list was prepared by James G. Pentz, Director of the Credentials Bureau, under the general supervision of the Deputy Superintendent, Doctor C. D. Koch.

JOHN A. H. KEITH

September, 1930

REQUIREMENTS FOR CLASSIFICATION OF PRIVATE SECONDARY SCHOOLS

Day Schools

A. Basis for Classification.

The Department of Public Instruction shall classify private secondary schools on the basis of reports from the principal and inspection by a representative of the Department of Public Instruction.

Private secondary schools not on the accredited list will be inspected by a representative of the Department of Public Instruction only upon the request of the proper official of the school. After a school has been placed on the accredited list, representatives of the Department of Public Instruction shall have the privilege of inspecting the school at any time.

Only high schools having an approved four year course will be accredited.

B. Standards for Classification.

1. Length of School Year.

After September 1, 1928 all private secondary schools for which classification is requested must have a school year of at least 180 days.

2. School Plant and Equipment.

At least three rooms equipped for assembly, laboratory, and classroom purposes, including a library, are necessary.

The location and construction of the building, the up-keep of the building and grounds, the heating and ventilating of the school rooms, the condition of the lavatories and closets, the water supply, furniture, apparatus, and methods of cleaning, shall be such as to secure hygienic conditions for both the teachers and pupils.

Adequate laboratory furniture and apparatus are to be supplied for all private secondary schools. The type and amount of equipment will depend upon the science program of the school.

Lists of apparatus and equipment are published by the Department of Public Instruction. Proper storage space is required for apparatus and supplies.

The library shall have an initial basic collection of at least 300 to 400 well selected volumes.

When the library is not housed in a separate library room.

proper shelving should be supplied in a class room or study hall.

Periodicals covering different fields form a part of the library equipment.

Sufficient texts, class and outside reading material, and adequate supplies to carry on effectively the work of instruction are to be provided.

3. Teachers.

The minimum number of full time teachers shall be three.

The standard of preparation for a teacher of academic subjects is the completion of a four year course in an accredited college. A minimum of at least three-fourths of the teachers are required to meet this standard of preparation.

The number of daily periods of class-room instruction for a teacher should not exceed five. A school requiring of any teacher more than six periods per day, must justify the teacher load under the standard of efficiency of instruction, the acquired habits of thought and study, and the general intellectual and moral level of the school.

The pupil-teacher ratio on the basis of an average daily attendance should not be greater than thirty. The standard size class under the direction of one teacher for recitations or instruction, should not exceed thirty pupils.

4. Program and Studies.

The program of study and the plan of organization must conform to the minimum standards of the Department of Public Instruction.

5. Requirements for Graduation.

Graduation from an accredited four year private secondary school shall require the completion of a four year secondary school course covering not fewer than 16 units. Of the 16 units, at least three units of English, two units of Social Science including American History or Problems of Democracy, one unit of a laboratory science above General Science, and one unit of Mathematics, preferably Algebra or Geometry, shall be required of all pupils. The remaining nine units shall be selected from the standard courses in the elective field. In addition to the 16 units specified before, music one period per week, physical education two periods per week, and health education one period per week, should be required of all pupils throughout the secondary school course.

The foregoing curriculum requirements apply to those pupils who pursue a general course or a commercial course or any other course which does not attempt to meet college entrance requirements. Special attention

of the pupils should be called to the curriculum requirements for college entrance (see—Admission to Professional Schools and other Higher Institutions, State Requirements).

A unit represents the work done in a given subject in a standard school year requiring approximately one-fourth of the student's time and aggregating not fewer than 120 clock hours of prepared work. A standard school year shall consist of not fewer than 180 days. Two hours of shop work or laboratory work are considered the equivalent of one hour of prepared work.

The minimum length of recitation periods is 40 minutes, exclusive of the time required for changing classes. A longer period is recommended.

6. Instruction.

The methods of instruction, provision for school supervision, pupil attitude, professional activities of teachers, and the general moral of the school as shown through systematic, competent and sympathetic inspection must be such as to be conducive to satisfactory pupil achievement.

7. Pupil Load.

The usual pupil load should average 20 periods of prepared recitation work weekly exclusive of Music, Health, and Activities. Only pupils ranking well above the average should be permitted to carry a program requiring more than this standard.

8. Records.

Accurate and complete records of attendance, scholarship, and school organizations, should be kept in such form as to be conveniently used and safely preserved.

9. Admission to Professional Schools and other Higher Institutions of Learning—State Requirements.

A certificate for four years of high school preparation, or its equivalent, is issued to those who have completed sixteen units in an approved four year high school or secondary school or by examinations, or by combined credits earned by both of these methods. The term "counts" is used only with reference to the requirements for equivalent high school credits. Eighteen counts are considered the equivalent of one year of work, four full years of work being the equivalent of 72 counts.*

Candidates for these certificates must have credit for eight (8) units or their equivalent to the extent of 34 counts

* (See publications of the Pre-Professional Credentials Bureau for information concerning pre-professional examinations and credit in terms of counts for each subject.)

in the following subjects: four years of English; one year of Mathematics (General Mathematics, Algebra or Geometry); one year of a laboratory science above General Science (Biology, Physics, or Chemistry); two years of a social science including American History or Problems of Democracy; and sufficient additional units in approved subjects to make a total of 16, or their equivalent of 72 counts. Of the additional eight (8) units, six (6) units shall be selected from approved subjects in the fields of Mathematics, History and Social Studies, Science or Foreign Languages. The two remaining units may be selected from approved laboratory courses in the field of Commercial Studies, Industrial Arts, Home Economics, Music, Art, or from the fields listed above. If work in Commercial Studies, Industrial Arts, Home Economics, Music or Art is offered for credit, not less than a half unit of work in an approved course in a given field, estimated on the laboratory basis, will be accepted.

The attention of superintendents and principals is called to these requirements inasmuch as pupils desiring admission to professional schools or other institutions for which the Credentials Bureau issues certificates, are often unable to secure such admission due to the fact that the curriculum pursued by the student was not arranged to comply with the foregoing admission requirements.

Evening Schools

Write to the Department of Public Instruction for information concerning the requirements for accrediting evening school work.

Summer Sessions

Write to the Department of Public Instruction for information concerning the requirements for accrediting summer session work.
